Continuation of 2. NOTE: Applicant amended independent claims 1, 11 and 12 to include the feature of each of the rotating bodies of a coordinate input device having an interior thereof with raised portions and recessed portions and the wheel having projections such that the rotating bodies, while rotating around the second axis, tactily communicate responsive to the rotation thereof. This feature is a burden to the Examiner because it raises new issues that were not previously presented, and thus, requires further search and consideration.

Continuation of 10. Other: The drawings filed on January 7, 2000 are accepted by the Examiner...
